• **Portfolio:** emmanuel121003.github.io

Professional Summary

Software Engineer passionate about building and maintaining systems that solve real problems. I have professional experience developing and supporting **enterprise systems in production**, mainly with **.NET/C#, Python, SQL Server and REST APIs**. I enjoy teamwork, understanding the business, and taking a solution all the way from the data model to on-site deployment.

Objective: to join as a **Junior Full Stack or Backend Developer**, contributing to real projects while I keep growing and deepening my skills in backend development, systems integration and software quality.

Professional Experience

E-GO Desarrollo de Software

Software Developer

Guadalajara, Mexico

May 2026 – Present

- **Scale II** (industrial weight-control system, *in production and used daily on the operations floor*): lead contributor to the Android app (Java), ensuring reliable field data capture; integration with the .NET/C# desktop application, hardware (Raspberry Pi) and SQL Server.
- **Gens** (POS + e-commerce): extended business-facing functionality by contributing to the C#/.NET POS and the web platform (Vue.js frontend and Node.js services).
- **PVM** (mobile POS): built the PHP web platform (lead registration and billing) and contributed to the Android app.
- Kept systems **available and reliable**: on-site deployment, incident resolution, data synchronization and backup via REST APIs, and SQL query optimization.
- Teamwork under **Scrum**, with Git and GitHub; technical documentation of changes and incidents.

E-GO Desarrollo de Software

Software Development Intern

Guadalajara, Mexico

Jan – Apr 2026

- Contributed to the weight-control system and integrated communication between the desktop app, mobile app and Raspberry Pi (Python, .NET, SQL Server, Android Studio); supported testing and documentation.

VirtuaMX

Web Development Intern

Durango, Mexico

May – Aug 2024

- Built frontend and backend modules and REST APIs under agile methodologies, delivering on time.

Featured Projects

- **MedicalRecords** (personal): medical records system in C#/.NET with SQL Server, layered architecture, automated tests and documentation. Sole author.
- **Attendance System** (PHP/MySQL): role-based attendance with QR and fingerprint check-in, relational model and exportable reports. github.com/Emmanuel121003/Asistencia
- **Livestock Management** (Python/Flask/SQLite): cattle registry with Excel and PDF export. github.com/Emmanuel121003/SistemaGestorDeGanado
- **Scanner-QR** (React Native/Expo) and **AgroBot** (team IoT + AI: Arduino, Firebase, Google Vertex AI).

Education

B.Eng. in Software Development and Management — Universidad Tecnológica de Rodeo 2024 – 2026

Technical Skills

Level: A = advanced, I = intermediate, B = basic.

- **Backend:** C#/.NET, PHP, Java (A); Python, ASP.NET Web API, Node.js/Express, REST APIs, Flask (I); Laravel, MVC (B).
- **Frontend:** JavaScript, HTML5, CSS3 (I); Vue.js, TypeScript (I); React, Tailwind (B).
- **Databases:** SQL Server, MySQL (A); SQLite (I); PostgreSQL, MongoDB (B).
- **Mobile:** Java / Android (A); React Native, Expo, Android Studio (I).
- **Systems & tools:** Git, GitHub (A); Postman, Scrum/Kanban (I); Linux/Raspberry Pi, Windows Server (B).
- **Others:** Cybersecurity (fundamentals), ISO 27001, IoT (Arduino/ESP8266), Google Vertex AI (B).

Certifications

- Artificial Intelligence Fundamentals — IBM
- Python Essentials 1 & 2 — Cisco
- Introduction to Data Science — Santander Open Academy
- Digital Security — Santander Open Academy
- EF SET English Certificate — Level B2 (59/100)
- Cybersecurity Fundamentals — IBM
- Complete SQL & Databases from Scratch — Udemy
- Internet of Things (IoT) — Santander Open Academy
- Microsoft Copilot / AI & Productivity — Santander Open Academy

Languages

Spanish: native. **English:** B2 (Upper Intermediate), backed by EF SET certificate; continuously improving.
