Professional Summary

Software Engineer with professional experience building and supporting **enterprise systems in production** (**.NET/C#, Python, SQL Server, REST APIs**). **Seeking a Junior Full Stack or Backend Developer role** to contribute to real projects and keep growing in backend development and systems integration.

Professional Experience

E-GO Desarrollo de Software — Guadalajara, Mexico

Software Developer — *May 2026 – Present*

- **Scale II** (industrial weight-control system, in production and used daily on the operations floor): lead contributor to the Android app (Java); integration with the .NET/C# desktop, Raspberry Pi and SQL Server.
- **Gens** (POS + e-commerce, large-scale client running across multiple shoe stores): contributed to the C#/.NET POS, Vue.js frontend and Node.js services; POS–e-commerce integration via REST APIs.
- **PVM** (mobile POS, used by several clients): built the PHP web platform with a relational data model and services for the Android app.
- Kept systems available and reliable: on-site deployment, incident resolution, data sync/backup via REST APIs and SQL query optimization; Scrum, Git and GitHub.

E-GO Desarrollo de Software — Guadalajara, Mexico

Software Development Intern — *Jan – Apr 2026*

- Contributed to the weight-control system and integrated communication between the desktop app, mobile app and Raspberry Pi (Python, .NET, SQL Server, Android Studio); supported testing and documentation.

VirtuaMX — Durango, Mexico

Web Development Intern — *May – Aug 2024*

- Designed and built a **corporate website with WordPress and Elementor**: responsive layout, contact forms, WhatsApp chat, basic SEO and testing through to launch.

Featured Projects

- **MedicalRecords** (personal): medical records system in C#/.NET with SQL Server; layered architecture, relational model, tests and documentation.
- **Attendance System** (PHP/MySQL): role-based access, QR and fingerprint check-in, relational model and reports.
- **Livestock Management** (Python/Flask/SQLite): cattle registry with Excel and PDF export.
- **Scanner-QR** (React Native/Expo) and **AgroBot** (team IoT + AI: Arduino, Firebase, Vertex AI).

Education

B.Eng. in Software Development and Management — Universidad Tecnológica de Rodeo — 2024 – 2026

Associate Degree (TSU) in Information Technologies (Multiplatform Software Dev.) — Universidad Tecnológica de Rodeo — 2022 – 2024

Technical Skills

(A = advanced, I = intermediate, B = basic)

- **Core stack:** C#/.NET, SQL Server, Java, REST APIs, Git *(A)*; ASP.NET Web API, Node.js *(I)*.
- **Backend:** C#/.NET, PHP, Java *(A)*; Python, ASP.NET Web API, Node.js, REST APIs, Flask *(I)*; Laravel, MVC *(B)*.
- **Frontend:** JavaScript, HTML5, CSS3, Vue.js, TypeScript *(I)*; React, Tailwind *(B)*.
- **Databases:** SQL Server, MySQL *(A)*; SQLite *(I)*; PostgreSQL, MongoDB *(B)*.
- **Mobile / Systems:** Java/Android *(A)*; React Native, Expo, Git, GitHub, Postman, Scrum *(I)*; Linux/Raspberry Pi *(B)*.
- **Data & others:** Power BI, DAX, data modeling, ETL/Power Query *(I)*; ethical hacking / penetration testing, ISO 27001, IoT (Arduino/ESP8266), Google Vertex AI *(B)*.

Certifications

- Google Cybersecurity (Prof. Certificate) — Google/Coursera
- Ethical Hacking with Open Source Tools (Prof. Cert.) — IBM
- Microsoft Power BI Data Analyst (Prof. Certificate) — Microsoft/Coursera
- Foundations of Cloud Analytics (Specialization) — SAS/Microsoft
- Artificial Intelligence Fundamentals — IBM
- Cybersecurity Fundamentals — IBM
- Python Essentials 1 & 2 — Cisco
- Complete SQL & Databases from Scratch — Udemy
- Data Science & IoT — Santander
- Digital Security — Santander
- Microsoft Copilot / AI & Productivity — Santander
- EF SET English Certificate — Level B2 (59/100)

Languages

Spanish: native. **English:** B2 (Upper Intermediate), backed by EF SET certificate; continuously improving.
