• **Portfolio:** emmanuel121003.github.io

Professional Summary

Software Engineer passionate about building and maintaining systems that solve real problems. I have professional experience developing and supporting **enterprise systems in production**, mainly with **.NET/C#, Python, SQL Server and REST APIs**. I enjoy teamwork, understanding the business, and taking a solution all the way from the data model to on-site deployment.

Objective: to join as a **Junior Full Stack or Backend Developer**, contributing to real projects while I keep growing and deepening my skills in backend development, systems integration and software quality.

Professional Experience

E-GO Desarrollo de Software — Guadalajara, Mexico

Software Developer — *May 2026 – Present*

- **Scale II** (industrial weight-control system, *in production and used daily on the operations floor*): lead contributor to the Android app (Java), ensuring reliable field data capture; integration with the .NET/C# desktop application, hardware (Raspberry Pi) and SQL Server.
- **Gens** (POS + e-commerce): *large-scale client in the footwear retail sector, running the system across multiple shoe stores*. Extended functionality used in daily operations by contributing to the C#/.NET POS and the web platform (Vue.js frontend, Node.js services), including POS–e-commerce integration and catalog and inventory synchronization via REST APIs.
- **PVM** (mobile POS, *used by several clients*): built the PHP web platform (lead registration and billing), designing the relational data model and the services consumed by the Android app, to which I also contributed.
- Kept systems **available and reliable**: on-site deployment, incident resolution, data synchronization and backup via REST APIs, and SQL query optimization.
- Teamwork under **Scrum**, with Git and GitHub; technical documentation of changes and incidents.

E-GO Desarrollo de Software — Guadalajara, Mexico

Software Development Intern — *Jan – Apr 2026*

- Contributed to the weight-control system and integrated communication between the desktop app, mobile app and Raspberry Pi (Python, .NET, SQL Server, Android Studio); supported testing and documentation.

VirtuaMX — Durango, Mexico

Web Development Intern — *May – Aug 2024*

- Designed and built a **corporate website with WordPress and Elementor** for a client: responsive page layout (home, services, about and contact) aligned with the brand identity.
- Integrated contact forms and WhatsApp chat, applied basic SEO and ran cross-device and cross-browser testing through to publishing the site.

Featured Projects

- **MedicalRecords** (personal): medical records system in C#/.NET with SQL Server. Sole author; layered architecture (presentation, business logic and data access), normalized relational model, automated tests and technical documentation.

- **Attendance System** (PHP/MySQL): role-based attendance with authentication, QR and fingerprint check-in, relational data model design and exportable reports. github.com/Emmanuel121003/Asistencia
- **Livestock Management** (Python/Flask/SQLite): cattle registry with Excel and PDF export. github.com/. . . /Sistema
- **Scanner-QR** (React Native/Expo) and **AgroBot** (team IoT + AI: Arduino, Firebase, Google Vertex AI).

Education

B.Eng. in Software Development and Management — Universidad Tecnológica de Rodeo 2024 – 2026

Associate Degree (TSU) in Information Technologies (Multiplatform Software Development) — Universidad Tecnológica de Rodeo 2022 – 2024

Technical Skills

Level: A = advanced, I = intermediate, B = basic.

- **Core stack:** C#/.NET, SQL Server, Java, REST APIs, Git *(A)*; ASP.NET Web API, Node.js *(I)*.
- **Backend:** C#/.NET, PHP, Java *(A)*; Python, ASP.NET Web API, Node.js/Express, REST APIs, Flask *(I)*; Laravel, MVC *(B)*.
- **Frontend:** JavaScript, HTML5, CSS3 *(I)*; Vue.js, TypeScript *(I)*; React, Tailwind *(B)*.
- **Databases:** SQL Server, MySQL *(A)*; SQLite *(I)*; PostgreSQL, MongoDB *(B)*.
- **Mobile:** Java / Android *(A)*; React Native, Expo, Android Studio *(I)*.
- **Data & BI:** Power BI, DAX, data modeling, ETL/Power Query *(I)*; data visualization, data cleaning & preparation, Excel for analysis *(B)*.
- **Systems & tools:** Git, GitHub *(A)*; Postman, Scrum/Kanban *(I)*; Linux/Raspberry Pi, Windows Server *(B)*.
- **Cybersecurity:** cybersecurity fundamentals, ethical hacking / penetration testing with Kali Linux, Wireshark, Metasploit and OpenVAS, network traffic analysis, incident response, ISO 27001 *(B)*.
- **Others:** IoT (Arduino/ESP8266), Google Vertex AI *(B)*.

Certifications

- Google Cybersecurity (Professional Certificate, 8 courses) — Google/Coursera
- Ethical Hacking with Open Source Tools (Professional Certificate, 6 courses) — IBM/Coursera
- Microsoft Power BI Data Analyst (Professional Certificate, 8 courses) — Microsoft/Coursera
- Foundations of Cloud Analytics (Specialization, 4 courses) — SAS & Microsoft/Coursera
- Artificial Intelligence Fundamentals — IBM • Cybersecurity Fundamentals — IBM
- Python Essentials 1 & 2 — Cisco • Complete SQL & Databases from Scratch — Udemy
- Introduction to Data Science — Santander Open Academy • Internet of Things (IoT) — Santander Open Academy
- Digital Security — Santander Open Academy •Microsoft Copilot / AI & Productivity — Santander Open Academy
- EF SET English Certificate — Level B2 (59/100)

Languages

Spanish: native. **English:** B2 (Upper Intermediate), backed by EF SET certificate; continuously improving.
